

The display case is lined with three graphics. The left and right liners are photos of Paul and Nita Clever working at the CAP-72 crash site in December 2012. The bottom graphic is the back lining for the case. It shows a UTM grid map with coordinates of the crash location. The wreckage artifacts are tagged with identification information and are aligned on the two shelves. More than 40 items are displayed.

6994th Security Squadron Activated at Tan Son Nhut

LOCKED ON TARGET

...of the 6994th Security Squadron...
 ...of the 6994th Security Squadron...
 ...of the 6994th Security Squadron...

THE NETWORK - A network of all-weather airborne radio direction finding (ARDF) operations against low-powered enemy operated transmitters in the RVN and geriatric areas of Southeast Asia in support of requirements "to be found".

Activated in 1960, Detachment 3 of the 6994th SS was tasked by the U.S. Embassy and Central Intelligence Agency to support the ground forces protecting the Laotian provincial capital of Luang Prabang close to the Plain of Jars...and to locate and identify supporting forces using the Ho Chi Minh Trail to move troops and supplies through the Bolaven Plateau and into Cambodia.

ABOVE: The casket for the fallen is carried to its final resting site.

LEFT: EC-47s fly the "Missing Man" route formation during memorial service for the Tide 86 crew at Nha Trang - May 15, 1967

BELOW: Program cover for Tide 86 memorial service
